Therefore, an inverter rated at 10 kVA is equal to a 8 kW inverter. In general, inverters are able to handle a peak Wattage of a very limited duration for about 1.8 times the size of the inverter. When it comes to inverter sizing, installers will take two primary factors into account: the size of your solar panel system and your electricity usage.

This is why we have researched the solar inverter market of leading solar inverter manufacturers in South Africa and the world from different sources, such as system integrators, solar panel installers, distributors, and dealers, to help you make a more informed decision and find the best solar inverter manufacturers.
