What is a stored energy breaker?

A two-step stored energy mechanism is used to close and open the breaker. Energy is initially stored in the main springs of the stored energy mechanism. When the breaker is closed, spring energy is consumed, and sufficient energy is retained in the breaker to perform the tripping function.

Do Siemens SB encased systems breakers create new warranties?

Any statements contained herein do not create new warranties or modify the existing warranty. Siemens SB Encased Systems Breakers bridge the performance gap between Molded Case Circuit Breakers (MCCB) and Low Voltage Power Circuit Breakers (LVPCB).

What if a breaker is closed and in service?

CAUTION: Before conducting a "Trip" test on a SB breaker which is "Closed" and in service, caution should be taken to evaluate effects on downstream loads. The breaker will open during testing, resulting in a disruption of service. CAUTION: All internal accessories should be installed with the circuit breaker removed from service.

What is a circuit breaker?

The circuit breakers are constructed for either fixed or drawout installation. They can be physically grouped in central distribution switchboards, or used separately in stand-alone applications. The SB breaker is equipped with a two-step stored energy mechanism for closing and opening the breaker contacts.

Can two breaker breakers be closed at the same time?

Therefore, if the same key is required by each breaker in a multiple power source system, no two breakers in the system can be closed at the same time. To remove the key from the key interlock, press and hold the "open" pushbutton; turn and remove key. The breaker key interlock is not field installable.

How do I mount a 2000a breaker to a switchboard?

The outline drawing for the 2000A frame is located on pages 92-93. The locations of the mounting holes and the recommended screws are depicted on the drawing. All four mounting screws will be used to secure the breaker to the switchboard. Carefully uncrate the breaker and remove all packing material.
