Our products range from telecommunications (microwave repeaters, base stations, VSATs, and WLL telecommunication systems), solar systems for mining and gas industry, railway safety and traffic management systems, solar street lights, solar traffic lights, rural areas electrification, solar ...

So you want a solar powered portable generator? Or you want solar to charge batteries? Im confused. Also, I doubt you're going to get anything cheap that can power a fridge plus an AC for any decent length of time. 10,000 BTU is around 3kW so it could use 3kWh per hour - a decent sized battery is 20kWh - running AC alone could drain your battery in 7 hours.
