

Antigua and Barbuda 40kwh solar system

Does Antigua & Barbuda use solar energy?

Antigua and Barbuda receives an average of 268 hours of sunlight per month, making solar energy a considerable potential source and, in fact, it is currently widely used to heat water in the country. In addition, wind energy, which was extensively used in colonial times as evidenced with remnants of windmills throughout the country, may also be harnessed.

Can Antigua and Barbuda generate 400MW from wind?

According to a study by ONREL and the OAS titled 'Energy Policy and Sector Analysis in the Caribbean 2010- 2011', Antigua and Barbuda could generate 400MW of power from wind.

Why should you go green in Antigua?

One of the best reasons to go green is the immediate cost benefits, saving you significant money on your electricity bills. With an average five kilowatt-hour system in Antigua, you can save up to \$900 XCD monthly on your electricity bill! These savings can be put to better use to enhance your quality of living.
