Is electricity consumption declining in Argentina?

View the detailed consumption trends at country level (graphs, tables, analysis) in the Argentina energy report Electricity consumption has been declining since 2015 (-1.2%/year) to 124 TWh in 2020. It grew strongly between 2002 and 2015 (4.5%/year).

What is Argentina's energy transition?

With its increasing focus on wind and solar energy,Argentina's dependence on gas has steadily decreased since 2019. Argentina aims for 47% renewable electricity by 2030,while the IEA's Net Zero Emissions scenario sets out a global target of 60% renewable electricity by 2030. Explore the latest data on Argentina's energy transition.

What is Energa Argentina SA?

Energía Argentina SA is the state-owned energy agencyresponsible for the production,transport,and trade of petroleum,natural gas,and electricity. MAyDS (Ministerio de Ambiente y Desarrollo Sostenible) is the Argentine environmental authority responsible for granting licenses for new power generation projects.

Why are oil and natural gas production rising in Argentina?

Crude oil and natural gas production in Argentina are both nearing record highs,driven by increasing output from the Vaca Muerta shale formation,which is offsetting declining output from conventional oil and natural gas fields.
