

Z&#193;RATE, Argentina, Mar 31 (IPS) - Three giant concrete cylinders with inflated membrane roofs are a strange sight in the industrial park of Z&#225;rate, a world of factories 90 kilometers from Buenos Aires that heavy trucks drive in and out of all day long. They are the heart of a plant that is about to start producing energy from agro-industrial waste, for the first time in Argentina.

IPS Energy filiale du Groupe IPS Sp&#233;cialis&#233;e dans les &#233;tudes et installations photovolta&#239;ques. Solution R&#233;sidentielle (Basse Tension), Solution Industrielle (Moyenne Tension), Pompe Solaire (Site isol&#233;), production d"&#233;lectricit&#233;.

Our main customers are handling the generation, transmission, and distribution tasks in the global energy supply industry, from relatively small utilities to large companies such as American Electric Power in the US, the largest utility company in North America.

"This is a double solution, because energy is generated at the same time the environmental problem of waste disposal is solved," Ezequiel Tamburrini, head of the biogas plant, tells IPS. "I would say that in Argentina there is no collective awareness of the environmental problem of waste generation, and most people do not know that energy ...

IPS ENERGY a r&#233;cemment achev&#233; l'installation d'une centrale photovolta&#239;que de 381 kWc pour notre client SNCI. Cette installation repr&#233;sente un &#233;norme pas en avant dans la transition vers une &#233;nergie propre et renouvelable. L"&#233;nergie solaire est l'avenir, et nous sommes heureux de contribuer &#224; la construction d'un monde plus respectueux ...

IPS Expands Depth in Canadian Market with Low-, Medium-, and High-voltage Electrical Equipment and Services. Greenville, SC, October 17, 2024 - Integrated Power Services (IPS), a world-class provider of electrical, ...

CIGRE Canada is an annual event that gathers the global electric community to increase the expertise of power system professionals. IPS USA's Randy Norman and Jerry Day attended the event, sponsoring a booth and taking part in some other networking opportunities.

Al fondo, el pueblo de Olaroz, a 4000 metros de altura, con los cerros de la precordillera a sus espaldas. Frente al pueblo de la Puna argentina, est&#225; el salar del mismo nombre, en donde empresas extranjeras extraen litio. Sin embargo, las bater&#237;as de litio que hoy almacenan la energ&#237;a solar del pueblo son importadas. Cr&#233;dito: Daniel Gutman/IPS

el deseo de aprender y capacitarse sobre c&#243;mo ser una iglesia saludable. Cada uno de los asistentes recibi&#243; material valioso para llevar a sus congregaciones, con el prop&#243;sito de formar y edificar a sus miembros en amor, unidad y ...

BUENOS AIRES, Dec 10 2020 (IPS) - The unprecedented growth of renewable energies in Argentina over the last three years has borne its greatest fruit: the Cauchari solar park, with nearly one million photovoltaic panels and 300 MW of installed power, which was connected to the national power grid on Sept. 26. The solar park is located in the extreme northwest province of ...

IPS was recognized as a representative vendor in the last Gartner Market guide. Fill out the form, get a copy of the report and learn more about industry trends in the field of Asset Performance Management (APM)

While IPS Asset Performance Management and Enterprise Asset Management solutions support primarily the daily or weekly operational decisions and actions to improve the reliability and availability of the assets, IPS&#174; Asset Investment Planning software enhances complex, longer-term tactical and strategic decisions relating to the CAPEX/OPEX budget allocations and ...

High inflation cannot only be traced to rising energy and food prices on the world market. Price trends in Argentina have always been extreme: Between 1980 and 2019, annual average inflation was a staggering 215.4 per cent. Economic crises, state bankruptcies, the decline in savings and real wage losses are everyday matters.

OLAROZ, Argentina, Dec 18 2019 (IPS) - The intense white brightness of the salt flats interrupts the arid monotony of the Puna in northwest Argentina, resembling postcards from the moon. Beneath its surface are concealed the world's largest reserves of lithium, the key mineral in the transition to clean energy, the mining of which has triggered controversy.

BUENOS AIRES, Feb 24 2018 (IPS) - The Argentine population can now generate their own energy through clean and unconventional sources and incorporate surpluses into the public grid, thanks to a new law. This is an ...
