

Avancis solar panels Montserrat

Who makes Avancis solar panels?

AVANCIS develops & produces premium solar modules "Designed & Made in Germany". Highest quality as well as many years of expertise in coating & heat treatment of glass characterize the high demands on engineering, efficiency & design standards.

What makes Avancis solar panels special?

"The special Avancis color technology enables dynamic coloring and thus an interplay of light and color, and the matt, noble surface creates an architectural highlight." Avancis has developed a high-efficiency solar panel with a CIGS absorber, sodium-based post-treatment, and cadmium-free sputtered zinc oxysulphide buffer.

Who is Avancis?

AVANCIS is one of the pioneers of thin-film photovoltaics and has the longest experience in the commercial series production of CIGS solar modules. We cover the entire value chain - from basic research to product marketing. The recycling and disposal of our products at the end of the product life cycle is ensured via take-e-way.

The original project, a low-rise building, was thus converted in the first step into a high-rise building, which was then available as a free-standing building all around for solar energy. During further planning, care was taken to ensure that, as far as possible, no building elements could cause shadows to be cast.

Saint-Gobain Solar is expanding its product offering in North America through the introduction of Avancis PowerMax[®]; premium class photovoltaic (PV) modules. PowerMax combines Copper-Indium-Selenide (CIS) solar power technology with a sophisticated slim design, providing what the company describes as an ultra-efficient, cost-effective energy solution.

The SKALA 120-140W, crafted by Avancis, is a cutting-edge solar panel that showcases technological excellence and environmental responsibility. With power outputs ranging from 120W to 140W, it offers an efficient and sustainable energy solution for various applications. This frameless glass-glass module is designed with aesthetics and functionality in mind, seamlessly ...

Experience the pinnacle of solar technology with PowerMax 4.6 by Avancis. This groundbreaking solar module combines advanced engineering with unparalleled performance, making it the ultimate choice for residential and commercial applications. PowerMax 4.6 is designed to deliver exceptional energy yield. With one of the highest energy outputs per ...

On April 26th ten eastern German companies from the solar industry founded the SOLAR POWER TRANSFORMATION CLUSTER "SPOT ON" e.V. in Halle. This association aims to network companies from various eastern German states in the areas of production, services and research and thus strengthen eastern Germany as a solar location.

SKALA is unique - in terms of design, energy efficiency, performance, quality and product safety. SKALA is a multi-functional building material which generates solar energy. Architects, facade planners and investors are given the possibility to realize individually designed solar facades with the highest aesthetics and...

Re: Avancis solar panels I've been looking at expanding my system with CIS panels because they apparently do slightly better than crystalline types in cloudy weather. They're typically used where: a) space isn't an issue, because they're less efficient than crystalline so need more area for the same W. b) orientation isn't

AVANCIS, leading manufacturer of premium class CIGS solar modules, enhances its own efficiency world record for thin-film solar modules. The new international standard is achieved with an externally certified power conversion efficiency of 19.8 % for an encapsulated thin-film module with integrated serial connection of size 30 cm x 30 cm.

What is the main advantage of AVANCIS SKALA façade panels? The SKALA panel is uniform black, no solar cells are visible The SKALA panel has no frame (architects don't like frames) The SKALA panel has no mechanical clamping / brackets on the front glass It is mounted by an invisible metal rail system on the backside of the panel
