

Benin emperreal energy and services

Why is Benin reliant on electricity imports?

Benin is reliant on electricity imports for a significant share of its energy supply. Reform programmes, including plans for electrification, have been put in place in the country, where only 30% of the population had access to electricity in 2017.

Does Benin have energy resources?

While Benin has many energy resources, it lacks the infrastructure both to convert these resources into electricity and to transport the electricity throughout the country. Energy resources in Benin and most Western African countries are not evenly distributed.

How many people in Benin have electricity?

As of 2020, approximately 32% of Benin's population has access to electricity, leaving approximately 1.5 million citizens without access. On average, 56% of the urban population has access to electricity, while only about 11% has access in rural areas.

What is the energy mix in Benin?

Energy in Benin has a diverse energy mix and takes several forms including: solar, wind, hydropower, biomass, fossil resources, and mineral resources. Out of this energy mix, about 60% of energy comes from biomass. Benin is also dependent on energy imports from Ghana and Côte d'Ivoire.

Are there empirical studies on Benin's energy situation?

However, no empirical studies were found in literature on studies of the Republic of Benin's energy situation, and so more research and studies focusing on Benin are needed. Table 1. Summary of literature on the subject. 3. Benin's energy situation 3.1. Energy consumption

Who is responsible for generating electricity in Benin?

Societe Beninoise d'Énergie Électrique (SBEE) is responsible for generating around 13% of electricity in Benin through diesel generators. ABERME (Agence Beninoise d'Électrification Rurale et de Maîtrise d'Énergie), on the other hand, is responsible for rural energy supply.
