Historically like other modern developed countries around the world, Bermuda has depended on fossil fuel for energy production for electricity, heating, cooling and transportation. Due to this dependence on external resources for energy, security of supply and production of energy have always been subjects of interest by both government and non-government entities.

Bermuda: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

“Any battery production at Novo Energy is dependent on third party or other partner involvement,” Volvo Cars writes in the press release. Volvo Cars' plans to roll out its vehicles won't be impacted because of this due to the company's diverse battery supply chain. Ad. Load more news. Contact
