How will a solar power plant benefit Botswana?

The solar power plant will ensure that approximately 48,000 tons of CO₂ emissions will be avoided and power approximately 20,000 households annually. Botswana is rich in natural resources and has vast solar energy potential, receiving over 3,200 hours of sunshine per year.

Will a 100 MW solar plant be built in Botswana?

State-owned Botswana Power Corp. has signed a power purchase agreement with a consortium of Chinese enterprises and other companies to construct a 100 MW solar plant in southern Botswana. The project is expected to start generation by the end of 2025.

Who is sinotswana green energy?

The agreement is in place between Botswana Power and Sinotswana Green Energy, a consortium of Chinese and Botswana companies, jointly established by China Harbor Engineering Co., China International Water and Electric Corp., and New Energy Company Proprietary Ltd., a local company. A tender for the project took place last year.
