Botswana's energy capacity is thermal, produced mostly in coal-fired plants with a few small diesel generators in rural areas. The 132 MW Morupule coal-fired station generates most of the domestic electricity supply. More than 50 per cent of Botswana's power requirements are imported from South Africa and Zambia.

For every collector sold, we have committed to planting 25 trees as part of our sustainability goal. This batch of solar collectors, for our pilot project in Rwanda, means that we have funded the plantation of 1,800 trees with our partner Ecologi. Together, these solar collectors and trees will annually mitigate the production of 32,400 kilograms of carbon.

We are the leading solar energy company in Botswana and South Africa that distributes Victron Energy products, Freedom Won Lithium Iron Batteries and high quality Renewsys solar panels

In 2019 while working as a lecturer at Heriot-Watt University in Edinburgh Scotland, SolarisKit founder Dr Faisal Ghani came across a journal paper stating that households in Kigali Rwanda were spending up to 40% of their total income paying their energy bill, most of which was used for heating water.. As a mechanical engineer working in solar heating for over 15 years this struck ...
