Primergy Solar and Quinbrook Infrastructure Partners in a July 18 news release said the Gemini Solar-Plus-Storage project in Nevada's Clark County is now fully powered up, ...

The past two years of energy price shocks are set to reverberate for the foreseeable future. Wholesale prices are still around four times higher than they were in winter 2019-20. The structural issues that led to the energy crisis must be addressed. This is even more urgent as government protection schemes will wind down early this year.

MULTI-TECHNOLOGY The Gemini system's dual-energy transmission X-rays generate a high-resolution image in which metallic threats, such as guns and knives, are easily detected and fine details, such as tiny wires that could indicate an improvised explosive device, can be discerned. Dual-energy transmission technology uses two X-ray energy levels to determine the "effective" ...

While renewable energy sources reached record highs for the 22nd consecutive year, global energy-related greenhouse gas emissions also rose, reminding us that the path to a sustainable future remains steep. In Capgemini's 26th World Energy Markets Observatory (WEMO), we delve deep into the most pressing trends shaping the future of energy ...

Gemini Energy Banga Solar Power Project is a 10MW solar PV power project. It is planned in Western Visayas, Philippines. The project is currently in permitting stage. It will ...

The energy transition is a generation-defining challenge. But we believe it's not just what it averts, but what it enables in our economy and society, that matters. We envision a world in which energy is clean, affordable and abundant, powering a new wave of industrial growth and social opportunity.. The energy industry's transition to clean energy is a fundamental enabler for ...

Join 750+ executive decision-makers to re-construct the energy transition at Reuters Events: Global Energy Transition 2023. Together, we will unite energy, industrial, and government world leaders to redefine intersectoral net-zero discourse and confront the most business-critical industry challenges, collectively.

Join 750+ executive decision-makers to re-construct the energy transition at Reuters Events: Global Energy Transition 2023. Together, we will unite energy, industrial, and government world leaders to redefine ...

Bouvet Island is known as the most remote island in the world; Antarctica, over 1600 kilometers (994 miles) to the south, is the nearest land mass. Located near the junction between the South American, African, and Antarctic tectonic plates, the island is mostly formed from a shield volcano--a broad, gently sloping cone formed by thin, fluid lavas& #8212;that is ...

Organisations worldwide are making significant strides in environmental and social sustainability. To understand the progress being made, the Capgemini Research Institute conducted an extensive survey
