Will Natron build a Gigafactory in North Carolina?

The Edgecombe County facility will enable a 40-fold scale-up of Natron's current production capacity. Credit: Natron Energy/Business Wire. Natron Energy has announced plans to construct the first sodium-ion battery gigafactory in North Carolina, representing a \$1.4bn investment.

Who makes Natron batteries?

Build America. Buy America. With products sourced from minerals readily available in the U.S. and manufactured in Michigan, Natron Energy is a U.S. company that meets BABA requirements. The Power of Blue. The secret behind Natron's sodium-ion batteries is our patented use of Prussian blue electrodes.

Does Natron Energy make sodium ion batteries?

Natron Energy makes sodium-ion batteries strictly for commercial and industrial use. If you're a business or supplier that has an inquiry, feedback or an issue we can help address, please provide information below. Please note that Natron makes batteries for industrial applications only.

Is Natron Energy a publicly traded company?

Natron Energy is a privately held company and while we appreciate the immense interest from individual investors, there are no publicly traded stocks, nor individual investment opportunities available. I agree that my submitted data is being collected and stored.

What makes Natron batteries so powerful?

The Power of Blue. The secret behind Natron's sodium-ion batteries is our patented use of Prussian blue electrodes. Prussian blue, when combined with sodium ions, creates a chemistry that delivers super-fast charging and power delivery, with no friction. It's that lack of friction that enables our batteries to last much longer (over 50,000 cycles).
