

Why is Brunei focusing on developing downstream energy industries?

The country is focusing on developing downstream energy industries by maximising economic spin-off potential from upstream production and assets. Brunei Darussalam aims to reduce its energy intensity by 45% in 2035 from the baseline year of 2005, in line with its regional commitment to the Asia-Pacific Economic Cooperation.

Will Brunei cover 10% of its electricity consumption by 2035?

According to Brunei Energy White Paper, the country is planning to cover 10% (954 GWh) of its electricity consumption from renewable energy by the year of 2035. The document sets the ground for the renewable energy policy.

What is the energy supply of Brunei Darussalam?

In 2015, the total primary energy supply (TPES) of the country for both energy sources was 3.26 million tons of oil equivalent (Mtoe) in total, with 3.07 Mtoe or 94.3% from natural gas (Table 3.1). Brunei Darussalam has 922 MW of installed capacity in power generation of public utilities, including a solar photovoltaic (PV) at 1.2 MW.

Does Brunei Darussalam have a high rate of electrification?

According to the World Energy Outlook which published in 2016 by IEA, Brunei Darussalam has achieved 100% rate of electrification with only 6% of transmission loss. According to Brunei Energy White Paper, the country is planning to cover 10% (954 GWh) of its electricity consumption from renewable energy by the year of 2035.

How can Brunei reduce energy consumption?

Brunei has implemented the National Appliance Standards and Labelling Regulation, which aims at reducing domestic energy consumption in order to enable higher exports of gas. The Energy Efficiency and Conservation Program envisages the reduction of energy use by 45% by 2035 based in 2005 level

What is Brunei aiming to achieve in 2035?

The target is to increase the share of Renewable energy in the total power generation mix by 10% or 954,000 MWh in 2035 and at the same time to reduce energy intensity by 45% in line with Brunei's commitment to Asia-Pacific Economic Cooperation (APEC). with total of 3,420 ktoe. The majority of natural gas is exported.
