Does Brunei have a sustainable future?

Brunei is targeting 30% renewable energy in total power generation mix by 2035, with 200 MWp of solar energy by 2025. The launch event also saw the release of Hengyi's 2023 ESG Report, which highlights their progress in environmental sustainability, social responsibility, and governance.

Can Brunei achieve 200 MWp of solar energy by 2025?

The Sultanate also targets achieving at least 200 MWp of solar energy capacity by 2025. This project also supports the Brunei Climate Change Secretariat's strategies to increase renewable energy adoption and reduce carbon emissions.

What is Sinar & how will it impact Brunei?

The solar energy generated through Project SINAR will not only support the energy needs of Hengyi Industries' Petrochemical Refinery but also contribute to Brunei's national power grid when required, enhancing energy sustainability across the nation. Stage 1 of Project SINAR is targeted to be fully completed at the end of April 2025.

What are the major solar installations in Brunei?

Major active solar installations in Brunei include the country's first, Tenaga Suria Brunei, launched in 2010 with a capacity of 1.2 MWp, and Brunei Shell Petroleum's 3.3 MWp solar plant, launched in 2021 to supply power to its headquarters. Both plants have plans for further expansion.

Can Brunei change from natural gas to hydrogen?

"The country can also opt to change from natural gas production to hydrogen," he said. The Japanese energy expert also said Brunei has the potential to benefit from its association with Japan, Australia, and other countries by fostering collaboration for the transfer and assistance of green technology.

How much CO₂ is produced in Brunei Darussalam?

Oil and gas production, which accounts for over 60% of GDP, emits 3.3m tonnes of CO equivalent annually, and Brunei Darussalam's total CO emissions are an estimated 10m tonnes annually. The Tenaga Suria Brunei Photovoltaic Power Generation Demonstration Project (TSB Project) is Brunei Darussalam's sole large-scale renewable energy project.

Wood Group said on Monday that it has secured a \$250m contract extension from Brunei Shell Petroleum, Brunei's largest energy producer. The two-year extension will focus on the continued rejuvenation of BSP's offshore energy asset portfolio to maximise production capacity and efficiency, it said.

Although its dominant oil and gas sector will likely remain at the forefront of economic growth over the medium term, Brunei Darussalam has prioritised sector diversification and development of renewable energy
