

As a global medium-voltage solution, the Sunny Central UP is the core of our turnkey system for PV power plants. It has been developed for worldwide use and complies with the highest international security standards. The Sunny Central UP Plug & Play System combines central inverter, transformer and storage solution in a compact unit.

With a max. output of up to 4600 kVA and system voltages up to 1500 V DC, the SMA Sunny Central Storage allows for more efficient and flexible system design for battery power plants. The SCS UP-XT versions allow a system design with higher output power and higher short-circuit current contribution.
