

Cellcube corning Romania

The CellCube Module is an integral, encapsulated, sterile, single-use device that is 100% pressure-hold tested before shipment. It is comprised of a series of parallel, styrene plates joined to create thin, sealed, laminar flow spaces between adjacent plates. Each culture plate receives proprietary tissue culture treatment prior to assembly to ensure dense, uniform cell growth.

The Corning CellCube system provides a fast, simple, and compact method for the mass culture of attachment-dependent cells. It uses a tissue culture-treated growth surface for cell attachment, and continually perfuses the cells with fresh medium for increased cell productivity. The CellCube system provides an environment which more closely simulates in vivo conditions and reliably ...

Maximizing Yield for Attachment-dependent Cells with the Corning CellCube System Vero/HEK293T CellCube ...

Maximizing Yield for Attachment-dependent Cells with the Corning CellCube System ...

The Corning CellCube system provides a fast, simple, and compact method for the mass culture of attachment-dependent cells. It uses a tissue culture-treated growth surface for cell ...

CellCube 100% ...

The CellCube Culture System Clean Room Cart is a device designed for simplified installation, filling, seeding, operation and harvesting of up to four 100-layer CellCube modules. The cart is a stainless steel, autoclavable, mobile rack that can hold four CellCube modules in a small footprint. The modules can be rotated 360 degrees, and has an adjustable wheelbase which can be ...

Corning's Closed System CellCube Modules are now available with CellBIND surface treatment. A complete range of standard closed system accessories integrate seamlessly with AseptiQuik and MPC connectors for total adherent cell culture workflow solutions. Stands and carts are also available to link multiple CellCubes, enabling modular scale out in a small ...

Corning CellCube System The Corning CellCube system provides a compact, perfusion-based method for the mass culture of attachment-dependent cells. CellCube modules consist of a ...

The Corning CellCube system is a method for mass culture of attachment-dependent cells. It consists of CellCube modules, which are polystyrene plates joined together ...
