How much oil does a accumulator store?

For the accumulator 105 ml or 3.5 oz The link you provided shows 8 ounces, this is the total capacity on the system, it does not show the breakdown for each component. The accumulator stores pag oil when the system is off just like all the other components, when one flushes or replaces all or individual parts oil must be replaced.

How much oil do you put in a compressor accumulator?

When replacing a compressor accumulator, you need to replenish the oil in the desiccant bag. Put 3oz of oil in the accumulator. In total, the system requires 7-8oz of oil, so you should also put 4oz in the compressor.

Do I need an oil cooler & accumulator?

An oil cooler is also recommended for racing applications. Connect the oil filter, cooler and Accumulator in series as shown using -10AN lines and fittings. If a remote oil filter with a one way valve is not used, we recommend installing a one way check valve on the filter side of the accumulator.

How much ester oil should I use for a 134 accumulator?

7oz of new Ester 100 oil will be plenty for a new compressor with a new accumulator. Too much oil will hinder system performance. Be sure to use ONLY Ester 100 oil for a 134 retrofit. NEVER use PAG oil in a system that once contained mineral oil.

What are the lubricant specifications for my a/C system?

All oil specifications assume that A/C system has been properly cleaned, and new accumulator / filter drier has been installed. Specs are for total system capacities. Always refer to under hood decal as the primary source for refrigerant and lubricant information. Year Model Lubricant CHALLENGER (Cont'd) 11 6 Cyl. 3.6 Eng. - 23.00 Oz.
