

China-europe energy storage investment group factory operation

What is China doing with new energy storage?

In just a few short years,China's scale of new energy storage has ranked first in the world. New models and new business forms are developing vigorously,with smart microgrids,virtual power plants and others entering the fast lane of development.

What are China's new energy storage business models?

China's new energy storage business models have already shifted. Energy storage products with high technical performance, strong safety assurance, and reasonable costs will be more competitive in the market and will also promote the industry's continuous upgrade toward high-quality development.

How big is China's energy storage capacity?

According to CNESA data,the capacity of independent energy storage stations planned or under construction in China in the first half of 2022 was 45.3GW,accounting for over 80% of all new energy storage projects planned or under construction.

How many electrochemical storage stations are there in China?

In terms of developments in China,19 members of the National Power Safety Production Committee operated a total of 472 electrochemical storage stationsas of the end of 2022,with a total stored energy of 14.1GWh,a year-on-year increase of 127%.

What is the western China energy storage Forum?

After ten years of deep cultivation, the "Western China Energy Storage Forum" has grown into an important platform promoting coordinated development of new energy and energy storage in western China.

What are the top 10 Chinese companies in energy storage system shipments?

In the first half of 2025, the Top 10 Chinese companies in terms of energy storage system shipments in the global market were, in order: Sungrow, CRRC Zhuzhou Institute, HyperStrong, Envision Energy, SCETL, XYZ Storage, ROBESTEC, Sunwoda Energy, CSI Solar, and Trina Storage.
