The event showcases innovative scientific and technological solutions related to solar energy. With exhibitors and visitors from over 35 countries, ExpoSolar Colombia presents the latest developments in a rapidly evolving market that has become the most important renewable energy source in the global energy matrix.

The nature of solar as a renewable source of electricity allows for much greater independence than does the nature of fossil fuels sourced from abroad -- and for this reason, such distinct types of energy dependence can't be equated. 3. Solar is an intermittent energy source, which presents the need for sometimes clunky adaptations.
