When will DR Congo's solar power plants be built?

The plants are to be built by the Moyi Power joint venture and are expected to be completed within 18 months after the start of construction. According to the latest figures from the International Renewable Energy Agency, DR Congo only had 20 MW of installed PV capacity at the end of 2020.

Who is ortus energy?

Our experienced management team have delivered over 300MWp of distributed energy generation in Europe, USA, and India. Ortus Energy specialises in distributed energy projects, saving our clients money on their bills and creating energy security.

How much power does DR Congo have?

According to the latest figures from the International Renewable Energy Agency, DR Congo only had 20 MW of installed PV capacity at the end of 2020. The country has one of the lowest levels of access to electricity in the world, with only 9% of the population being supplied with power. This percentage in rural areas drops to as far as 1%.

Why should you choose ortus energy?

Ortus Energy specialises in distributed energy projects, saving our clients money on their bills and creating energy security. And more... You simply benefit from reduced electricity rates, allowing you to save money on your energy bills. When this electricity is being purchased at a cheaper rate than from a traditional grid supplier.

Will a \$100 million solar project power Gemena & Bumba & Isiro?

An international consortium led by Powergrids plans to invest \$100 million in three off-grid solar plants intended to power the cities of Gemena, Bumba, and Isiro, which are located in the country's northern region and currently have no connection to the country's power network.
