

# Cook Islands solar panels on commercial buildings

Does the Cook Islands have solar power?

The Cook Islands Electricity Sector historically been powered by diesel generators. Since around 2011, increasing solar PV generation on Rarotonga has changed this situation. And in 2014- 15, installation of 95-100% renewable solar hybrid systems on the Northern Group Islands further altered the mix.

What is a Cook Islands map?

Cook Islands Map depicts Northern and Southern Island groupations. All Islands from the Northern group are smaller and have limited requirements for electrical energy. Most of the Cook Islands people live in the Southern Islands. Two largest Islands are Rarotonga (main island) and Aitutaki

Where do most people live in the Cook Islands?

Most of the Cook Islands people live in the Southern Islands. Two largest Islands are Rarotonga (main island) and Aitutaki The Government of the Cook Islands has a long standing policy commitment of 100% renewable electricity by 2020.

How many islands are in the Cook Islands?

The Cook Islands Located in the South Pacific Ocean, the Cook Islands has 15 islands, of which 12 are inhabited. Most of the Cook Islands 13,000 permanent residents live on Rarotonga, in the south. Aitutaki has a population of approximately 1,800, and remaining islands are sparsely populated. Fig 1.

Solar panels supplied by the Australian Defence Force are helping Cook Islands Police address their financial troubles. At a time when the Police Service has been financially crippled by huge power costs, the Maritime Surveillance Centre (MSC) at Avatiu harbour has made major strides in reducing its operational costs.

1: Initial Investment. The initial investment in commercial solar systems can vary based on several factors, including system size, roof condition, and the type of solar panels used. Additional installation costs may include labor, permits, and electrical upgrades. However, long-term savings often outweigh these upfront costs, making solar a smart financial decision.
