

How many battery containers can a ship carry?

It could carry 120 battery containers to provide 576,000kWh of power to propel a vessel requiring 3,000kW (4,000 hp) at 10 knots for 180 hours. The batteries would deliver up to 190 hours of service prior to depletion and exchange for fresh batteries.

Can you transport lithium ion batteries in a dry container?

At that time, HMM also decided to permit the use of dry containers for transporting battery-equipped vehicles instead of refrigerated containers, which are typically used for temperature-sensitive goods. "Lithium-ion batteries are still acceptable only in refrigerated containers," an HMM spokesperson said.

What types of batteries can I mail or ship internationally?

There are many types of batteries that have different requirements when you wish to mail or ship them internationally: Wet batteries, also known as flooded lead-acid batteries, are commonly found in vehicles and backup power systems.
