

What is the goal of the Cyprus Energy Agency?

The goal of the Cyprus Energy Agency for the period 2020-2030 is to study energy storage solutions and to promote policies that will support the Energy Transition of Cyprus in an environmentally sustainable way. " Renewable Energy Sources in Cyprus - Sponsorship plan for the promotion of RES and energy saving - Photovoltaic Systems.

Does Cyprus have a natural energy source?

A remarkable 62% of the country's export earnings is used to pay for the country's oil import. Cyprus has no natural oil resources and relies entirely on imported fuel for its energy demands. At the present, the only natural energy resource available is solar energy. Fig. 1. Cyprus primary energy sources.

What types of energy resources are available in Cyprus?

Solar, wind energy and biomass are the three available forms of RES. This paper will examine and analyze the energy system of Cyprus. It will examine the RES available and the extent of the energy needs could be satisfied by them.

How can RES support the energy transition of Cyprus?

The combination of RES, with the rapidly evolving energy storage technologies, make this goal achievable, even for Cyprus. The goal of the Cyprus Energy Agency for the period 2020-2030 is to study energy storage solutions and to promote policies that will support the Energy Transition of Cyprus in an environmentally sustainable way. "

How does electricity work in Cyprus?

Electricity in Cyprus is managed by the Electricity Authority of Cyprus. Power is primarily generated at three fuel oil-burning stations but the use of distributed renewable energy is expanding. About 97% of the primary energy use was imported in 2008.

What REs can be used economically in Cyprus?

Cyprus renewable energy potential An analysis of all available RES would give an indication of the percent of energy needs that could be satisfied. The RES that could be used economically are wind energy, solar energy and biomass. 4.1. Wind potential
