

# Czechia tian power

What type of energy is used in Czechia?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Czechia: How much of the country's energy comes from nuclear power?

How many nuclear power plants does the Czech Republic have?

The Czech Republic operates two nuclear power plants: Temelín and Dukovany. As of 2019 the government intends to increase the share of nuclear electricity production from 30 % to 58 %. To this end, a new reactor is to be constructed at the Dukovany site, which will replace older units by 2035.

Where does the Czech Republic buy oil & gas?

The country is integrated into regional transmission systems and can purchase oil and gas from different countries based on market prices in Rotterdam or elsewhere. Most oil and gas are imported via Germany. The Czech Republic has two nuclear power plants at Dukovany and Temelin, which delivered over 31 TWh of electricity in 2022.

Is coal still used in Czech power generation?

Coal still provides most of the fuel used in Czech power generation. While coal's phase-out is assumed in 2035-2038, coal-based energy companies already face difficulties due to the rising costs of carbon credits and other impacts of the EU's Green Deal.

Who is responsible for reprocessing nuclear waste in the Czech Republic?

The Czech Republic has no state policy on storage or reprocessing of nuclear waste, and the responsibility for this falls to the Czech Power Company (CEZ). The CEZ does not believe reprocessing is economical, [citation needed] and stores spent fuel until the Radioactive Waste Repository Authority (RAWRA) assumes responsibility for it.

Does the Czech Republic produce natural gas?

The Czech Republic has no significant production of natural gas or oil and is fully dependent on imports. The country is integrated into regional transmission systems and can purchase oil and gas from different countries based on market prices in Rotterdam or elsewhere. Most oil and gas are imported via Germany.
