

DR Congo geo energy group

Who is Congo energy?

Exclusive distributor of PRAMAC products in the DRC, Congo Energy offers a wide range of reliable and efficient generator sets. Our energy solutions cover various sectors, from light industry to specific infrastructures such as health and data centers. Thanks to our expertise, we offer tailor-made solutions and efficient after-sales service.

How much power does DR Congo have?

According to the latest figures from the International Renewable Energy Agency, DR Congo only had 20 MW of installed PV capacity at the end of 2020. The country has one of the lowest levels of access to electricity in the world, with only 9% of the population being supplied with power. This percentage in rural areas drops to as far as 1%.

What are the main sources of energy in the Congo?

Hydropower: For which the Congo River is the main source, with an average flow rate 42,000 m³/s. Biogas: Coming mainly from both plant and animal waste. Solar: The DRC has noticeably high solar radiation averaging 6 kWh/m²/day.

What certificate does Congo energy have?

Congo Energy has the certificate issued by ARSP (Autorité de Régulation de la sous-traitance dans le secteur privé). This certificate certifies that Congo Energy is authorized to work as a subcontractor in the Democratic Republic of Congo. Congo Energy strives to provide its partners and customers with high-quality products and services.

Does Congo have a potential for renewable power generation?

As mentioned earlier, the country possesses a significant potential for renewable power generation, which is illustrated further as follows: Hydropower: For which the Congo River is the main source, with an average flow rate 42,000 m³/s. Biogas: Coming mainly from both plant and animal waste.

When will DR Congo's solar power plants be built?

The plants are to be built by the Moyi Power joint venture and are expected to be completed within 18 months after the start of construction. According to the latest figures from the International Renewable Energy Agency, DR Congo only had 20 MW of installed PV capacity at the end of 2020.
