

Denmark oku solar panels

What is Oku's solar heating?

Oku's solar-panels are especially designed for this application. This is what Oku's solar heating provides: maximum efficiency and the right temperature for your swimming-pool. Enjoy a warm and comfortable pool temperature with Oku's solar heating.

How do Oku solar panels work?

The water of the swimming pool can flow through the Oku's solar-panels in either direction, so they can be mounted both lengthwise and side by side. The individual rows of panels are connected on a Tichelmann principle (same routes for each row). It is not advisable to connect more than seven panels in series.

Why should you choose Oku's solar panels?

Oku's solar-panels, made of high density polyethylene, offer the right foundation for operating such installations. low pressure loss, high efficiency, non-corroding resistant to swimming pool water absolutely frost-proof, produced in one piece resistant to animal bite marks supports human weight simple to install - modular system

1. Oku-Absorber werden mit teilweise geschlossenen Anschlüssen geliefert. Werden zur Serien-Schaltung weitere Anschlüsse benötigt, jeweils die Kappen mit einer Metallsäge abschneiden.
2. Oku-Absorber auf der vorgesehenen Fläche auslegen und gemäß dem Anschlusschema mit Verbindungsstücken und Schlauchschellen verbinden.
