

Dnv energy Mayotte

Is Mayotte a good place to get electricity?

Electricity in Mayotte in 2015 was 95% thermal sources and 5% renewable energy. The multi-year energy program sets a target of 30% renewable energies in final consumption in 2020. Electricity needs are growing strongly due to the growth of Mayotte and its population, as well as the increase in electricity.

What is the energy sector like in Mayotte?

The energy sector in Mayotte is mainly oriented towards the consumption of electricity based on fossil fuels; renewable energies are currently underdeveloped for the moment, and there is no export of fossil fuels. Electricity in Mayotte in 2015 was 95% thermal sources and 5% renewable energy.

Which port generates most of the electricity in Mayotte?

The port of Longoni generates most of the electricity in Mayotte. The energy sector in Mayotte is mainly oriented towards the consumption of electricity based on fossil fuels; renewable energies are currently underdeveloped for the moment, and there is no export of fossil fuels.

How many thermal power stations are there in Mayotte?

There are two thermal power stations in Mayotte, consisting of 17 diesel engines in all. The motors are of different powers (between 750kW and 8MW) and use different technologies. This makes it possible to adjust as needed.

What makes DNV a leader in the 2024 Verdantix Green Quadrant?

At DNV, our dedication to providing credible and impactful sustainability assurance has earned us a leadership position in the 2024 Verdantix Green Quadrant for ESG & Sustainability Assurance Services.

Why should you choose DNV?

Through our advanced technical expertise and regulatory understanding, we deliver unique insights and knowledge that help our customers to deliver energy in a safe and sustainable way. Our collective deep and broad knowledge among 12,000 employees in DNV enables us to fulfill our purpose to safeguard life, property, and the environment.

Our 5,000+ energy experts deliver certification, verification, monitoring, and advisory services across the entire energy value chain, including renewables, oil and gas, transmission and distribution, and end use.

Transitioning faster to a deeply decarbonized energy system. As the world's leading resource of independent energy experts and technical advisors, we help industries and governments to navigate the many complex, interrelated transitions taking place globally and regionally in the energy industry.
