Why did domlec Commission a new power plant in Dominica?

The commissioning of these units is not just a technical achievement but also a sign of DOMLEC's commitment to improving electricity supply and reliability for the residents of Dominica. The entire DOMLEC team, including engineers and technicians, has been focused on ensuring the success of this project.

Why choose as the sole supplier of electricity in Dominican Republic?

DOMLEC, as the sole supplier of electricity in the Dominican Republic, promises the public the best in customer service and reliability. Our goal is to deliver the quality and range of services that meet the needs and demands of your busy lifestyle.

What will domlec do on November 26?

This Sunday, November 26, is set for the commissioning of a critical power project- the integration of an additional three megawatts of electricity into the island's power grid, a move that promises to enhance energy stability and efficiency. DOMLEC's progress update yesterday was the platform for this announcement.

Will two leased units boost domlec's generation?

An additional two units leased to the Dominica Electricity Services Limited (DOMLEC) which arrived in Dominica on November 10, are expected to boost DOMLEC's generation and provide relief from load shedding currently being experienced. This was according to Prime Minister Rosevelt Skerrit during a press conference on Wednesday.

How much power will domlec get from Skerrit's government?

Skerrit said his government procured additional generator units amounting to 4.8 megawatts of power which will be leased to DOMLEC by the government on very favorable terms.

Why did domlec add a new generator?

DOMLEC's progress update yesterday was the platform for this announcement. The additional capacity, sourced through a rental agreement with Aggreko, a US-based generator rental company, includes two units that arrived on the island on November 10. This addition is a strategic response to the recent load management challenges faced by the island.
