

# Drax power Vanuatu

Who uses Drax power?

Drax supplies renewable source power to over 165,000 businesses and organisations across the UK, including electricity from Drax Power Station. We provide and manage electricity for large industrial and commercial sector customers from our offices in Northampton and Ipswich. Opus Energy

Who is Drax Group plc?

Drax Group plc, trading as Drax, is a power generation business. The principal downstream enterprises are based in the UK and include Drax Power Limited, which runs the biomass fuelled Drax power station, near Selby in North Yorkshire. The Group also runs an international biomass supply chain business.

Who is Drax Energy Solutions?

Drax Energy Solutions Limited: registered in England and Wales, number 05893966. Registered office: Drax Power Station, Selby, North Yorkshire YO8 8PH My Drax Energy portal allows you to submit meter readings, check account balances, analyse energy use, and access offers on partner products and services.

Who owns Drax Power Station?

In 1990, the electricity industry of England and Wales was privatised under the Electricity Act 1989. Three generating companies and 12 regional electricity companies were created. As a result of privatisation, Drax Power Station came under the ownership of National Power, one of the newly formed generating companies.

What is my Drax Energy?

My Drax Energy puts you in control of managing your energy, whatever the time and place. Available via desktop, tablet and mobile, the portal lets you submit meter readings, check account balances by site, analyse your energy use - and more. It also gives you access to exclusive offers on selected partner products and services.

What happened to Drax Power Station?

One significant change was the emergence of vertically integrated companies, combining generation, distribution and supply interests. In certain cases, it became necessary for generation assets to be divested, and so in 1999 Drax Power Station was acquired by the US-based AES Corporation for \$1.87 billion (US\$3 billion).

The 2.6-GW Drax Power Station in northeastern England--once Western Europe's largest coal-fired power plant--is poised to pioneer bioenergy with carbon capture and storage (BECCS), a negative emissions technology. In a move to establish a stronghold on emerging prospects for BECCS, Drax Group has now set out to launch an independent ...
