

Does North Macedonia need electricity?

Although North Macedonia's renewable energy potential is huge (especially solar), the country is still dependent on importing electricity-imported electricity constitutes around 30% of the overall gross consumption.

Should North Macedonia accelerate the transition to renewables?

Like others in the region, North Macedonia must balance its need to rapidly accelerate the transition to renewables to secure its energy future with the need to ensure that future is one where both the country's nature and people thrive.

What are the challenges for renewable investors in North Macedonia?

The crucial challenges for renewable investors in North Macedonia are: Assessing the possibilities for grid connection- this must be made at earliest stage of the project. Initiation of adoption of a new or amended spatial plan or project for the impacted area.

Should a land conversion procedure be performed in North Macedonia?

Performing a land conversion procedure. As North Macedonia's land is predominantly agricultural, there are only few large portions of privately owned construction land. Therefore, if the land intended for building of a power plant is agricultural, a prior conversion procedure should be performed.

Is North Macedonia a good candidate for smart siting?

Seeing the country's forward-thinking approach to renewables and natural beauty, The Nature Conservancy (TNC) identified North Macedonia as a prime candidate for the implementation of the smart siting approach currently being undertaken in Croatia and Serbia as well.

Is North Macedonia a biodiversity hotspot?

However, despite its small land area, North Macedonia also stands out as a biodiversity hotspot, housing a significant portion of Europe's biodiversity. This includes 64% of the continent's bird species and 34% of mammal species--all on an area smaller than 0.3% of the European subcontinent.
