The Global Solar Atlas provides a summary of solar power potential and solar resources globally. It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for any location covered by the solar resource database.

Traditional solar panels, batteries, and your inverter are going to cost way more in Ecuador, just like all imported high tech equipment. My suggestion is to use propane for cooking and hot water (if you need hot water), passive solar (skylights).

Recent additions include: Delsi Tanisagua Hydro Power Plant (180MW), Minas San Francisco Hydro Power Plant (270MW), the Sabanilla Hydro Power Plant (30MW), the Sarapullo Power Plant (49MW), and the ...

I live in a remote area of Ecuador. We have 110v grid power, but it has recently become unstable due to the low volume of water in the hydro reservoirs. During the worst period we had power cuts for 3 hours a day, each day, usually during my peak work hours. I work in the daytime on the internet and have a Starlink internet.
