

Energy group as Zimbabwe

What is the energy profile of Zimbabwe?

Fig. 1: The Kariba Dam, which provides Zimbabwe with much of its hydropower, as seen from Zimbabwe. (Source: Wikimedia Commons) Zimbabwe is a landlocked country with an energy profile mainly divided amongst wood fuel (61%), petroleum (18%), electricity (13%), and coal (8%).

Why should the IEUG be established in Zimbabwe?

The establishment of the IEUG in Zimbabwe is seen as a real game changer, it allows the private sector to procure reliable, secure, predictable, and uninterrupted power at competitive prices.

How has the IEUG negotiated with the Zimbabwean authorities?

To this end, the IEUG has negotiated with the Zimbabwean authorities to conduct independent negotiations with regional and domestic power producers and to import power via the regional system through ZESA Holdings infrastructure.

Does Zimbabwe have a sovereign wealth fund?

Zimbabwe's sovereign wealth fund will own 10 percent and the remaining stake available to institutional investors. The IEUG is a private sector-led effort to improve the energy supply in Zimbabwe. The group is composed of companies, mainly mining firms, consuming over 1MW daily. First phase PPA
