It is partially State-owned with 51% of the share capital held by Actis, 5% by Eneo employees and 44% by the State of Cameroon. In generation, Eneo has an installed generation capacity of 968MW.

What is the energy mix in Cameroon?

According to the Cameroon Energy Situation (SEC) in 2011, the energy consumption mix was 73% biomass, 20% oil and gas products and 7% electricity totaling around 6000ktoe (Kilo tons of oil equivalent) for the whole country and converted to about 0.3toe (tons of oil equivalent) per capita.

What is the main energy source used in Cameroon?

The main energy source used in Cameroon is still biomass. For cooking and heating purposes, the majority of Cameroonians still rely on biomass, which is abundant and to certain extent renewable and affordable. Electricity and gas are still very lowly used, mostly because of non-availability and non-accessibility, especially in the rural areas.

Does Cameroon have energy potentials?

From this paper, it is obvious that Cameroon has huge energy potentials. There are proven deposits of crude oil, large rivers, biomass and solar energy that have not been fully utilized. Energy production from hydropower has been the main focus of the governments for many years.
