How does the energy storage system work?

These components work together to ensure the safe and efficient operation of the container. The capacity of cell is 306Ah, 2P52S cells integrated in one module, 8 modules integrated into one rack, 5 racks integrated into one container. As the core of the energy storage system, the battery releases and stores energy

What is nameplate versus useable capacity?

In layman's terms, nameplate versus useable capacity is not unlike your annual salary versus your actual take home pay after taxes, social security, health care and other expenses have been deducted. In theory, your offer letter says you will earn \$50,000 annually, but your paychecks only deliver a usable \$32,500.

Does ENERC+ container have an UPS system?

EnerC+container have integrated two UPS system, one is for FSS monitoring system which available capacity is 24 hours, another one is for BMS which available capacity is 20 minutes The UPS is only used to supply power to BMS components. The UPS is included in the Aux power supply

What are the advantages of ENERC+ container?

2) New generation Cell. EnerC+container integrates the LFP 306Ah cells from CATL, with more capacity, slow degradation, longer service life and higher efficiency. 3) High integrated. The cell to pack and modular design will increase significantly the energy density of the same area.
