Can energy storage improve solar and wind power?

With the falling costs of solar PV and wind power technologies, the focus is increasingly moving to the next stage of the energy transition and an energy systems approach, where energy storage can help integrate higher shares of solar and wind power.

What is the cost of financing for offshore wind energy projects?

Financing costs are typically reported as the weighted average cost of capital (WACC). For deriving WACC, we rely on a recent elicitation of 70 global experts on the cost of financing (Taylor, Beiter, and Egli 2023). This expert elicitation suggests a cost of equity of 9% and a debt share of 60% for U.S. offshore wind energy projects in 2021.

What drives the long-term cost trajectory of offshore wind energy?

The long-term cost trajectory of offshore wind energy is driven by the learning rate, which captures cost reductions from increased efficiency, learning by doing, technology innovations, and maturing supply chains.

How does wind and solar impact wholesale prices?

Figure: LBNL In most markets, growth in wind and solar reduced average, marketwide wholesale prices by less than \$1.30/MWh over this period, although California was an exception, with solar reducing prices by \$2.20/MWh. This may foreshadow greater impacts from solar in other regions as solar penetrations grow.

How do wind and solar power prices change?

Since wind and solar power have no fuel cost, they push the price down by replacing more expensive fuel-consuming power plants. As wind and solar gradually become the primary power supply sources, market prices will drop on average, but price variations are likely to increase.

How much does a 600 MW wind plant cost?

That study assumed a 600-MW wind plant with semisubmersible floating substructures and 6-, 10-, 12-, and 15-MW turbines for a COD of 2019, 2022, 2027, and 2032, respectively. In Hawaii, the LCOE of a 600-MW floating offshore wind plant with 15-MW wind turbines was estimated to average roughly \$69-\$81/MWh with a 2032 COD (Shields et al. 2021b).
