

Energy storage smart grid project tender announcement

When does Amprion open a tender for energy storage projects?

Amprion invited tenders for the project in late November (21 November), giving interested providers until 3 April, 2025, to submit bids. The tender is non-discriminatory, Amprion said, and will cover the construction and operation of the energy storage projects, which will be deployed at five substations and total 250MW of grid-supporting capacity.

Can energy storage technology be used for a 'decentralised grid booster'?

A tender for the provision of energy storage technology for a 'decentralised grid booster' deployment has been launched by Amprion, one of the four major transmission system operators (TSO) in Germany. Amprion invited tenders for the project in late November (21 November), giving interested providers until 3 April, 2025, to submit bids.

Is Amprion launching a 'grid booster' energy storage project in Germany?

Amprion has launched a tender for its 'grid booster' energy storage project, totalling 250MW of capacity, in Germany.

What is a grid booster energy storage project?

Grid booster energy storage projects have been launched by three out of Germany's four TSOs, and are placed at critical grid nodes to stabilise the grid and reduce operating costs. The other announced projects, by TransnetBW and TenneT, are both being provided by system integrator Fluence.

Polaris Energy Storage Network has learned that recently, Guangdong Power Grid Corporation has issued a special tender announcement for the 2025 distributed ...

Ofgem has launched a new cap and floor investment support scheme, unlocking billions in funding to build major Long Duration Electricity Storage projects for the first time in ...

The authors support defining energy storage as a distinct asset class within the electric grid system, supported with effective regulatory and financial policies for development ...

Grid-scale energy storage solutions are capable of supporting the sustainable growth of renewable energy sources integration with the power system and providing grid-balancing ...
