The International Chamber of Shipping (ICS), working with the governments of Bahamas and Liberia, has presented a new proposal aimed at ensuring the delivery of the International Maritime Organization's (IMO) target to achieve net zero greenhouse gas (GHG) emissions from international shipping by or around 2050.

The energy storage unit from KONGSBERG is specifically designed for demanding marine applications and optimised for both hybrid and pure electric vessels. The demand for green solutions in the maritime industry is driving an increased use of clean electrical power systems that utilise energy storage.

BESS is grid-forming most of the day, ensuring the supply for the whole island thanks to PV generation and energy storage management. Then, gensets ensure the spinning reserve, mainly running at night. The gensets load is controlled to optimise the diesel energy generation ratio, and to share the operating time for a longer engine lifetime.
