

# Energys nexsys Monaco

What is a NEXSYS air wireless charger?

NexSys; AIR wireless chargers deliver the convenience of hands-free charging across a wide range of automated guided vehicle (AGV) applications. Able to charge battery technologies, NexSys; AIR wireless chargers help boost safety, reliability and productivity.

What is a NEXSYS ion battery monitoring device?

All NexSys;+chargers are Wi-iQ; battery monitoring device enabled to provide battery type, voltage and capacity data to the charger. The charger will automatically compensate for temperature when the Wi-iQ; battery monitoring device is configured correctly. Achieve 94% efficiency in recharge when used with NexSys; iON batteries.

How does NEXSYS; compact battery charger work?

NexSys; COMpact battery charger can be physically installed into the battery tray or into the truck, making charging fast and easy. NexSys; COMpact battery charger allows an operator to drive to the nearest AC socket and recharge the battery without needing to drive to the charging station.

What is EnerSys;?

As the global leader in stored energy solutions for industrial applications, EnerSys; has long been developing technologies to help material handlers maximize productivity and profitability.

Can a NEXSYS; TPPL battery be charged anywhere?

When integrated with our NexSys; TPPL batteries, the truck can be recharged anywhere, anytime. \*\*NexSys; COMpact battery charger can be physically installed into the battery tray or into the truck, making charging fast and easy.

How does NEXSYS; ion recharge work?

Achieve 94% efficiency in recharge when used with NexSys; iON batteries. With high frequency (HF) modular technology, NexSys;+chargers continue the charging process by automatically bypassing module faults to ensure uninterrupted operations.

o NexSys;+ chargers are programmable and include charging profiles for NexSys; TPPL batteries, NexSys; iON batteries and all flooded battery technologies - helping with mixed ...

NXSTND Designed for NexSys; 2V batteries at 0.2 to 0.25 C6 charging rates. NXFAST Designed for NexSys; 2V batteries at 0.26 to 0.40 C6 charging rates. VRLA IEIE (constant current, constant voltage, constant current, constant voltage) profile type for Valve Regulated Lead Acid (VRLA) batteries. LITHIUM Designed for NexSys; iON batteries.
