What is ESB Smart Energy Services?

ESB's Smart Energy Services offers battery solutions to enable large businesses to store energy generated during low tariff periods and use it when tariff prices are high. Partnering with us is easy. Once we've analysed your energy usage, we'll design a storage system to meet your needs.

How does ESB invest in battery storage technology?

ESB has shown its commitment to battery storage technology through active investment. We have over 300MWs of two-hour storage across five sites, enough to power around 200,000 homes. That represents an investment of EUR300million.

What is ESB's biggest battery storage project?

Its first BESS site launched in 2022, a 19MW/38MWh project also located in Aghada. ESB chief executive Paddy Hayes called the launch of the company's "largest battery storage project so far" a "significant milestone". It replaces the 75MW/150MWh BESS at Poolbeg in Dublin as the biggest of ESB's projects.

Is Poolbeg the EU's largest battery energy storage system?

The 75MW/150MWh battery in Poolbeg is to be the EU's largest battery energy storage system (BESS) project by energy capacity, the companies said. A second 30MW/60MWh asset is also to be developed at South Wall, with both batteries to be developed at existing ESB plants.

Where is ESB developing a 30mw/60mwh battery?

A second 30MW/60MWh asset is also to be developed at South Wall, with both batteries to be developed at existing ESB plants. Together with projects already underway at Inchicore, Dublin, and Aghada, Co Cork, the companies now have a portfolio of 308MWh under development.

What is ESB doing in 2022?

In 2022, ESB launched the first of its BESS sites, the 19MW (38MWh) project - also in Aghada. Earlier in 2024 a new 75MW (150MWh) project was opened at ESB's Poolbeg Energy Hub in Dublin. ESB is delivering the project with energy storage product experts Fluence and Irish company Powercomm Group.

A major battery plant has been opened in Cork which will add 150MW (300MWh) of fast-acting energy storage to Ireland's electricity system. ESB opened its latest battery plant at its Aghada which is hoped will help to provide grid stability and deliver more renewable power.

ESB has opened its latest major battery plant at its Aghada site in Co Cork which will add 150MW (300MWh) of fast-acting energy storage to help provide grid stability and deliver more renewable ...

State-owned electricity company ESB and energy storage technology company Fluence have announced two

kicking off its pipeline of projects in the Republic of Ireland. ... The sites mark the start of a pipeline of long-duration battery storage project the ESB is planning to deliver, in order to create greater flexibility and aid Ireland in its ...

ESB has shown its commitment to battery storage technology through active investment. We have over 300MWs of two-hour storage across five sites, enough to power around 200,000 homes. That ...

Irish state-owned utility ESB has launched a 150MW battery storage facility in County Cork, adding 300MWh of energy storage to stabilize the grid and support renewable energy integration. La empresa estatal irlandesa ESB ha puesto en marcha una instalaci&#243;n de almacenamiento de bater&#237;as de 150 MW en el condado de Cork, a&#241;adiendo 300 MWh de ...

ESB partnered with Fluence and Powercomm Group to deliver this project. Image: ESB. Irish state-owned electricity company ESB has opened a 150MW/300MWh battery energy storage system (BESS) at its Aghada site in Co Cork. The project is the latest step in ESB's commitment to investing EUR300 million (&#163;251 million) in battery storage technology.

A planning application for the first iron-air battery storage project in Europe at a location south-west of Buncrana has been submitted to Donegal County Council.

Electricity Supply Board (ESB) has announced almost 100MWh of utility-scale battery storage projects, kicking off its pipeline of projects in the Republic of Ireland. ... The sites mark the start of a pipeline of long-duration ...

ESB has partnered with Fluence as well as Irish company, Powercomm Group, to deliver this project; ESB has today (Nov 15) opened its latest major battery plant at its Aghada site in Co Cork which will add 150MW (300MWh) of fast-acting energy storage to help provide grid stability and deliver more renewable power onto Ireland's electricity system.

Image: ESB. ESB Networks has announced that Ireland's electricity grid now has 1GW of energy storage available from different energy storage assets. This figure includes 731.5MW of battery energy storage system (BESS) projects and 292MW from Turlough Hill pumped storage power station - which is celebrating its 50th anniversary this year.

renewable energy on the electricity system by storing excess energy generated by renewables when electricity demand is low and ...

This battery-energy-storage-system (BESS) is the latest in ESB's pipeline of projects to be delivered at sites in Cork and Dublin, which are part of its investment of up to EUR300m in the technology. In 2022, ESB launched the first of its BESS sites, the 19MW (38MWh) project, which is also in Aghada.

Cork, Ireland - ESB has today opened a major battery plant at Aghada, Co Cork, which will add 19MW (38MWh) of fast-acting energy storage to help provide grid stability and deliver more renewables on Ireland's electricity system. The projects are ESB's first in a pipeline to deliver grid-scale battery technology at sites in Co Cork and Dublin.

A 100MW battery storage facility in Co. Offaly in Ireland has this week been energised, having been developed as part of a partnership between local developer Lumcloon Energy and South Korea's Hanwha Group. ... Irish network operator ESB Networks said it had enabled the connection and energisation of the project - situated in the Lumcloon ...
