Sharp's 80W solar panel offer industry-leading performance, durability, and reliability for a variety of electrical power requirements. Using breakthrough technology perfected by Sharp's nearly 45 years of research and development, these modules use a textured cell surface to reduce reflection of sunlight, and structure to improve conversion efficiency.

The implications of sustainable energy in a country plagued by darkness are immeasurable. "As the Forward Foundation looks for ways to impact our global community, offering opportunities that bring solar power to people throughout Eswatini is a great honor," says Robin Lally, President of the Forward Foundation.

which will help to pay for the power from South Africa and the maintenance of the solar system. Operational cost savings will begin right away, and TWR engineers expect this solar system will pay for itself in about ten years.
