

Solar energy serves as a solution to global decarbonisation efforts. However, true sustainability goes beyond tackling climate change and providing affordable clean energy. The solar sector is increasingly focused on its own sustainability and is committed to accelerating efforts to reduce the impacts across its complex value chain.

In fact, the market has doubled or close to doubled in size now for three consecutive years, and the total fleet across Europe represented 35.9GWh of energy storage capacity by the end of 2023. Nonetheless, this ...

The crucial role of battery storage in Europe's energy grid (EurActiv, 11 Oct 2024) In 2023, more than 500 GW of renewable energy capacity was added to the world to combat climate change. This was a greater than 50% increase on the previous year and the 22nd year in a row that renewable capacity additions set a record. However this turn to ...

A panel discussion on the Polish market at the recent Energy Storage Summit CEE in Warsaw. Image: Solar Media . The European Commission (EC) has approved a EUR1.2 billion (US\$1.32 billion) state aid package for Poland to support the deployment of electricity storage facilities.

In May, as the European Union (EU) launched REPowerEU, the energy storage industry's initial disappointment at being excluded from an early leaked draft of the document - which set out pathways to reduce dependence on Russian gas and accelerate decarbonisation - gave way to a more positive feeling.. REPowerEU in its final form did include mention of ...

This report explores both the contracted and merchant revenue landscapes of energy storage projects in Europe, mapping out viable routes to market and assessing existing investment opportunities. By leveraging Wood Mackenzie's Europe Power Service price data (covering wholesale power, ancillary services and capacity markets), the report ...

Agrisolar projects can be divided into broad categories: Elevated Agri-PV where panels are elevated above the crops or livestock thanks to the metal structures; ; Interrow Agri-PV where panels are placed vertically allowing the agricultural activity to take place in between the "rows" of PV modules;; Solar PV placed on the artificial structures, such as agricultural buildings, ...

European Energy divests three solar parks in the UK. Dec 19, 2024. Press release. European Energy wins battery auction in Poland. Dec 18, 2024. Press release. Jammerland Bugt offshore park in Denmark receive construction permit. Dec 17, 2024. Press release. European Energy signs agreement with Oklahoma State. Dec 05, 2024

The European energy storage industry has witnessed remarkable growth over the last decade, going from 9MW of project announcements in 2010 up to a total of 5,700MW in 2020 (year to date). Out of these projects, around 1.7GW are operational while the remaining 4GW are either announced or under construction (Figure 1) [1].

Europe has seen its first year when energy storage deployments by power capacity exceeded 10GW in 2023. The eighth annual edition of the European Market Monitor on Energy Storage (EMMES) was published last week by consultancy LCP Delta and the European Association for Storage of Energy (EASE).

France is also part of the European six nation shared frequency regulation market - which we heard more about from Corentin Baschet in our discussion of why energy storage deployment in Europe experienced a 2019 slowdown but is expected to bounce back and then continue to grow in the coming years. Of course, as we've seen in the past few months ...

While the UK is a standout leader of the continent in terms of deployment figures, and arguably also sophistication of business models - as pointed out in a new study by Aurora Energy Research - tracking the European market is also becoming much more interesting, Darmani said. "There was maybe not as much to speak about a couple of years ago on the ...

European battery company Northvolt has filed for Chapter 11 "reorganisation" bankruptcy in the US, which it said will allow it to restructure its debt to continue scaling the business. ... The Energy Storage Summit USA is the only place where you are guaranteed to meet all the most important investors, developers, IPPs, RTOs and ISOs ...

The energy regulator in Greece has cancelled the country's third large-scale energy storage procurement auction due to confusion over limits on how much power capacity could be bid in per participant, with a view to relaunching the scheme. ... Solar Finance & Investment Europe 2025. February 4 - February 5, 2025. London, UK. Energy Storage ...

2 &#0183; European Energy views battery storage as a cornerstone of its future strategy, aligning with its commitment to integrating innovative technologies into renewable energy solutions. Beyond Lithuania, the company has announced a battery project in Poland and is actively exploring similar initiatives in other European countries, where energy ...

The EU is bringing in increased security requirements for energy assets including energy storage as the risks grow, particularly in Central and Eastern Europe (CEE). Energy is critical infrastructure and energy storage units will effectively be the "nodes" of the future grid, one delegate said at last week's Energy Storage Summit Central ...

ees runs in parallel with Intersolar next week in the Smarter E conference and expo series" European edition. Image: Solar Promotion GmbH. An estimated 80,000 professionals from the solar PV, energy storage and

electric mobility sectors converge in Munich, Germany, for the Smarter E Expo and conference each year, including ees Europe.

The facility marks European Energy's first venture into large-scale hydrogen production using renewable energy. Construction of the facility was completed in June 2024 and after a successful commissioning phase, the facility is now operational with the first electrolyser supplied by the Danish company Stiesdal.

Panelists at this year's Energy Storage Summit Central and Eastern Europe (CEE) in September described Hungary's scheme as one of the most advanced in the world. Grant support for energy storage in the EU has also been activated via a separate scheme, the post-Covid-19 Recovery and Resilience Plan, including in Romania, Finland and Greece.

As reported by Energy-Storage.news however, and perhaps due in part to input from the industry and advocates, in both cases, later versions of the plans were revised to feature explicit treatment of energy storage. Energy storage does however have friends or allies in the EU government: case in point being a 2020 report spearheaded by Austrian ...

Indeed, while Europe's adoption of energy storage has proliferated in the past couple of years, with 10GWh of mostly residential batteries installed in 2023, experts from EASE and consultancy LCP Delta said earlier this year that there is a big mismatch between the speed of deployment and the overall need for storage on the system.

At various meetings throughout Intersolar Europe/ees Europe in June, Energy-Storage.news heard corroborating views from several sources, including Alvaro Garcia of EFT that the C& I market in Europe is starting to shine. EFT is a "global local service partner" to Chinese lithium battery and EV maker BYD, initially servicing products for the ...

Leading energy storage developers, system integrators, products, projects, people, and much more are featured on the shortlists for this year's Energy Storage Awards (ESAs). The Energy Storage Awards 2024, hosted by our publisher Solar Media, marks the second year of recognition and celebration of achievements across the European industry. We ...

The European energy storage industry has witnessed remarkable growth over the last decade, going from 9MW of project announcements in 2010 up to a total of 5,700MW in 2020 (year to date). Out ...

The European Association for Storage of Energy (EASE), established in 2011, is the leading member-supported association representing organisations active across the entire energy storage value chain.
