100% Sustainable Electricity in the Faroe Islands: Expansion Planning Through Economic Optimization
Abstract: SEV, the Faroese Power Company, has a vision to reach a 100% renewable power system by 2030.

Summary Overview Electricity Oil consumption Government energy policy See also External links
Energy in the Faroe Islands is produced primarily from imported fossil fuels, with further contributions from hydro and wind power. Oil products are the main energy source, mainly consumed by fishing vessels and sea transport. Electricity is produced by oil, hydropower and wind farms, mainly by SEV, which is owned by all the municipalities of the Faroe Islands. The Faroe Islands are not connected by power lines with continental Europe, and thus the archipelago can...
