

# Finland energy korea inc

Finland and South Korea engaged in active cooperation in talent exchange. Shortage of specialists is already holding back growth in Finland, but more international talent is also needed if Finland wants to succeed in the global competition for investments. South Korea is an interesting partner for Finland in terms of talent exchange.

FuelCell Energy Inc. (FuelCell Energy) and Korea Hydro & Nuclear Power Co. Ltd. (KHNP) announced that the two companies have agreed to jointly pursue hydrogen energy business initiatives and have signed a memorandum of understanding (MOU) outlining the possibilities. The cooperative approach will focus on the development and implementation of ...

Renewable energy has been on the rise in Finland; renewable energy accounts for 50.76% of total final energy consumption where bioenergy, hydropower and wind power were the major renewable production methods. As a result, the share of fossil fuels in the total energy supply dropped to 36%, which is significantly lower than the IEA average of 70%.

Finland's renewable power strategy is paying off as its energy has fallen into negative prices. A new nuclear reactor, as well as unexpected floods, are leading to a glut of clean energy.
