

Gemini energy Uruguay

Who is Gemini energy services?

Let Gemini earn your business! Gemini Energy Services is an Operations & Maintenance wind turbine service company for wind turbine manufacturers in the wind turbine service field.

What is the main source of energy in Uruguay?

Fossil fuels are primarily imported into Uruguay for transportation, industrial uses and applications like domestic cooking. Four hydroelectric dams provide much of the country's energy supply. Historically, energy has been a stronghold of state-owned companies, such as UTE and ANCAP.

Why does Uruguay generate a surplus of electricity?

Typically, Uruguay generates a surplus of electricity due to an excess of wind-power capacity. The country seeks to identify additional domestic uses for excess electricity and potentially increase exports to Argentina and Brazil.

When did Uruguay start evaluating nuclear energy?

In July 2011 the government announced that Uruguay was soon to enter Phase 1 of an evaluation of nuclear energy, [a] providing 10 million Uruguayan pesos from the national budget to hire specialist advisers, consulting the population and reviewing the human resources and technology available.

What percentage of energy is generated by biomass in Uruguay?

In 2021, biomass represented 41 percent of the total energy supply in Uruguay, while oil and its derivatives were responsible for 42 percent. Uruguay's high percentage of biomass energy generation is a result of cellulose industry expansion where energy is generated from wood waste products.
