

# Global energy systems ltd Papua New Guinea

The small island economy of Papua New Guinea (PNG hereafter) is one of the world's least electrified countries and is facing major challenges with poor access to electricity. 1 Unreliable power supplies and lengthy daily blackouts are impacting households and firms including the delivery of critical services in the economy. Only an estimated 13% of PNG's 8.6 ...

Goroka, 14 July 2020 - Papua New Guinea has set an aspiration to generate 100% of its electricity from renewable sources by 2050. To achieve this, it must encourage community participation in off-grid and energy efficient solutions. Efforts to invest in renewable energy will improve community livelihoods while offering the country an alternative to yesterday's fossil ...

Papua New Guinea (PNG) is the Pacific's largest country with one of the world's lowest rates of energy access (13%). To address this development challenge, Australia, Japan, New Zealand, and the USA joined hands with the PNG government in late 2018 and signed the PNG Electrification Partnership.

World Bank's Poverty Global Practice and World Bank Papua New Guinea Energy Team. The MTF team would like to thank the National Energy Authority of Papua New Guinea. In Addition, acknowledgment goes to the technical support provided throughout the entire survey process by the multi-stakeholder Technical Working Group.
