

Lancé dans une profonde transformation de son mix électrique, surtout thermique ; l'heure actuelle et projeté ; 60% renouvelable en 2030, l'île Maurice devient un territoire favorable pour les développeurs français ...

Changes in solar activity have previously been proposed to cause decadal- to millennial-scale fluctuations in both the modern and Holocene climates. Direct observational records of solar activity, such as sunspot numbers, exist for only the past few hundred years, so solar variability for earlier periods is typically reconstructed from measurements of cosmogenic radionuclides ...

Abstract. ^{10}Be is produced by the interaction between galactic cosmic rays (GCRs) and solar energetic particles (SEPs) with the Earth's atmospheric constituents. The flux of GCRs is modulated by the varying strength of the magnetic fields of the Earth and the Sun. Measurement of ^{10}Be concentrations from polar ice cores is thus a valuable tool to ...

The Greenland ice sheet is an archive of knowledge about the Earth's climate more than 125,000 years back in time. The ice was formed by the precipitation that fell as snow from the clouds and ...

Solar Farms; Roof Top; Ground Mount; Covered Structures; Off Grid. Energy Storage. Innovative Energy Storage Solutions; Interested In What We Do? Discover Some of Our Achievements. Discover. Follow Us. Follow; Follow; ...

We report high resolution measurements of the stable isotope ratios of ancient ice ($\delta^{18}\text{O}$, $\delta^2\text{D}$) from the North Greenland Eemian deep ice core (NEEM, 77.45° N, 51.06° E). The record covers the ...

Many people say that customers are equal to God. At Greenland Solar, our aim is to provide our customers with end-to-end solar energy services based on their individual needs. Greenland Solar was established in 2018. During these years, we have developed breakthrough capabilities to best serve our customers and provide them with a one-stop service for all their solar energy ...

Evidence of a Monstrous, Ancient Solar Storm Found Hidden in Greenland's Ice The second largest solar proton event in history took place over 1,000 years ago. By Jill Kiedaisch Published: Mar 14 ...

2410 C. I. Paleari et al.: Evaluating the 11-year solar cycle and short-term ^{10}Be deposition events model coupled with the aerosol module HAM, Heikkilä et al. (2009) showed that the dominant component of ^{10}Be in polar ice cores is stratospheric ^{10}Be , making up to about two-thirds of the signal preserved in ice cores from Greenland and

[1] Cosmogenic radionuclides extracted from ice cores hold a unique potential for reconstructing past solar activity changes beyond the direct instrumental period. Taking the geomagnetic modulation into account, the solar activity in terms of the heliospheric modulation function can quantitatively be reconstructed in high resolution throughout the Holocene. For ...

Adolphi et al. Solar Influence on Greenland Climate 2 rate changes on ice-core ^{10}Be concentrations, especially visible at transitions between stadials and interstadials (Fig. 1). However, both ...

Greenland and Antarctica to study the 11-year solar cycles, allowing us to assess the suitability of the CFA samples for the reconstruction of solar activity. This result opens new opportunities for the collection of continuous ^{10}Be records with less ...

Joanna Bérenger, qui avait révélé les zones d'ombre concernant l'attribution du contrat d'un montant de Rs 5 milliards à Corex Solar par le CEB, a été convoq...

Glaciochemical time series developed from Summit, Greenland, indicate that the chemical composition of the atmosphere was dynamic during the Holocene epoch. Concentrations of sea salt and terrestri... Skip to main content. ... STUIVER M, ATMOSPHERIC C-14 AND CENTURY-SCALE SOLAR OSCILLATIONS, NATURE 338, 405 (1989). Google ...

This solar power plant is a world first and paves the way for a new era of photovoltaic predictable, stable and available. Delivery is planned during the first half of the year. Corex participe au consortium SAFT/INGETEM pour la construction de la plus grande ferme photovoltaïque intégrant un système de stockage de l'énergie.

Measurements at the Milcent station in central Greenland have shown that during the period of solar quiescence known as the Maunder Minimum (AD 1645-1715) 7, a period when almost no

Greenland ice core shortly after a large fluence SPEs] Nitrate - solar activity relationship: a controversial issue Previous positive results (2) - Short-term scale causal connection between solar activity and nitrate levels in polar ice including both production and (fast) transport

Solar modulation of cosmogenic nuclide production over the last millennium: comparisons between ^{14}C and ^{10}Be . Earth and Planetary Science Letters 150:453-62. ... A detailed comparison of Asian Monsoon intensity and Greenland temperature during the Allerød and Younger Dryas events. Earth and Planetary Science Letters, Vol. 272, Issue. 3-4, p.

reported in the Greenland Ice Sheet Project 2 (GISP2) ice core for the time period between 3288 and 40,055 years B.P. The resolution is between 20 and 50 years in the Holocene. ... important information about the history of solar activity and of other causes of production rate variations such as changes in the geomagnetic field [e.g., Yiou et ...

Finally, we use the ^{10}Be records from Greenland and Antarctica to study the 11-year solar cycles, allowing us to assess the suitability of the CFA samples for the reconstruction of solar activity. This result opens new opportunities for the collection of continuous ^{10}Be records with less time-consuming sample preparation, while saving an ...

France-based oil and gas company TotalEnergies has expanded its renewable energy portfolio in the US by acquiring solar project developer Core Solar. Based in Austin, Texas, Core Solar has a 4GW portfolio that includes utility-scale solar and energy storage projects currently in various stages of development.

1 Introduction. Over the past two decades, Greenland near-surface air temperatures have increased rapidly [Box, 2013], forcing mass loss from the Greenland Ice Sheet [Hanna et al., 2013]. During this period, the ice sheet has contributed approximately one third of the global sea level rise of 3.22 ± 0.41 mm/yr from 1992 to 2011 [Hanna et al., 2013].

Changes in solar activity have previously been proposed to cause decadal- to millennial-scale fluctuations in both the modern and Holocene climates¹. Direct observational records of solar activity, such as sunspot numbers, exist for only the past few hundred years, so solar variability for earlier periods is typically reconstructed from measurements of cosmogenic radionuclides ...

Entre 5 et 6 millions d'euros (environ Rs 228 millions). C'est la somme que coûtera un projet photovoltaïque mené par la firme rouennaise Corex Solar, en collaboration avec le Central Electricity Board (CEB). Les premiers accords ont été signés l'hôtel Mercure Créolia, La Réunion, jeudi 13 avril, lors de la 5^e édition des rencontres du Développement ...

Locations of Greenland (a) and Antarctica (b) ice core sites with ^{10}Be records over the last 100 years used in this study. The new East Greenland Ice-core Project site is marked red.
