

Greenland power safe opzs

Why should you choose powersafe OPzS batteries?

The pasted negative flat plate design provides the perfect balance for maximum performance. The robust design of PowerSafe OPzS batteries makes them a perfect fit for your application.

What makes EnerSys powersafe OPzS a good battery?

Engineered with an optimized plate design, EnerSys PowerSafe OPzS batteries feature an increased capacity exceeding the DIN standard. Additionally, the die cast tubular plate design with low antimony offers excellent cycling capabilities and a proven long life under float conditions.

What are powersafe OPzS cells used for?

The specification of the PowerSafe OPzS cells make it ideal for a wide range of applications such as telecommunications, power generation and distribution, railway, airport and seaport signalling, computing, emergency lighting, automation and measuring systems.

Are powersafe OPzS batteries ISO 9001 certified?

Batteries must be installed in accordance with IEC 62485-2 and national/local regulations. The management systems governing the manufacture of PowerSafe OPzS products are ISO 9001, ISO 14001 and ISO 45001 certified 2022 EnerSys. All rights reserved. Trademarks and logos are the property of EnerSys and its affiliates unless otherwise noted.

Las baterías PowerSafe OPzS utilizan la tecnología de placas tubulares para ofrecer un excelente rendimiento en ciclos y una larga vida demostrada en condiciones de flotación. El diseño de sus placas negativas planas empastadas proporciona el equilibrio perfecto para alcanzar el rendimiento máximo en un amplio intervalo de capacidades.

EnerSys PowerSafe 24 OPzS 3000 Summary: EnerSys PowerSafe 24 OPzS 3000 Batteries are engineered with an optimized plate design and they feature increased capacity exceeding the DIN standard. Additionally the die cast tubular plate with low antimony content offers excellent cycling capabilities and a proven long life under float conditions.

Power Storage Solutions Installation and Service for 6 OPzS 300. We understand that data centers are heavily reliant on batteries for backup power. We also understand that batteries must be redundant and if only one battery in your ...

EnerSys PowerSafe OPzS batteries are designed to offer reliable backup power in critical applications. They feature rugged construction, long service life, and high efficiency, making ...

Con una placa optimizada, las baterías Powersafe OPz cuentan con una mayor

Greenland power safe opzs

capacidad que supera el estándar DIN. Además, la placa tubular fundida a presión con bajo contenido de antimonio ofrece excelentes capacidades de ciclo y una larga vida útil comprobada en condiciones de flotación. El diseño de placa plana negativa pegada proporciona el ...

EnerSys PowerSafe 5 OPzS 250 Summary: EnerSys PowerSafe 5 OPzS 250 Batteries are engineered with an optimized plate design and they feature increased capacity exceeding the DIN standard. Additionally the die cast tubular plate with low antimony content offers excellent cycling capabilities and a proven long life under float conditions.

A série GetPower GP OPzS utiliza placas positivas tubulares, o que contribui para uma excelente performance em aplicações de média e longa intensidade de descarga. Suas grades são produzidas com chumbo de excelente qualidade, que utiliza na liga um teor de antimônio (Sb) menor que 2%, reduzindo assim o consumo de água ao longo de sua ...

The EnerSys range of PowerSafe OPzS batteries has been designed for use in all standby power applications that demand the highest levels of reliability and security. PowerSafe OPzS cells benefit from an optimised plate design that results in increased capacity compared to the requirements of the internationally recognised DIN standard. In addition, the flooded tubular ...

Engineered with an optimized plate design, EnerSys PowerSafe OPzS batteries feature an increased capacity exceeding the DIN standard. Additionally, the die cast tubular plate design with low antimony offers excellent cycling capabilities ...
