Would grid-forming be an application for residential rooftop solar without Bess?

Would grid-forming be an application for residential rooftop solar without BESS to operate when the grid is down? To our knowledge there are few commercial PV residential inverters (like SMA Sunny Boy) that can provide limited power (up to 15A at 120V) in off-grid mode if enough sunlight is available.

Can a residential PV inverter provide limited power in off-grid mode?

To our knowledge there are few commercial PV residential inverters (like SMA Sunny Boy) that can provide limited power (up to 15A at 120V) in off-grid mode if enough sunlight is available. Residential Inverter will be disconnected from the grid and will not inject any current to grid during outage.
