Reliable and efficient, this kit includes 100W off-grid solar panels in a compact design. It is waterproof and durable, however, its charging may depend on weather conditions. 4.

Stand-alone systems are made of elements that generate, store and output electrical energy. On these systems the power generating element is the solar panel. It captures solar radiation and transforms it into electric power. On windy areas, a wind generator can be added as well. In order to control and store energy, solar chargers are used.
